(54) Title: **REPROGRAMMABLE SECURITY FOR CONTROLLING PIRACY AND ENABLING INTERACTIVE CONTENT**

(57) Abstract: Technologies are disclosed to transfer responsibility and control over security from player makers to content authors by enabling integration of security logic and content. An exemplary optical disk (200) carries an encrypted digital video title combined with data processing operations (225) that implement the titles security policies and decryption processes. Player devices include a processing environment (e.g., a real-time virtual machine), which plays content by interpreting its processing operations. Players also provide procedure calls to enable content code to load data from media, perform network communications, determine playback environment configurations (225), access secure non-volatile storage, submit data to CODECs for output (250), and/or perform cryptographic operations. Content can insert forensic watermarks in decoded output for tracing pirate copies. If pirates compromise a player or title, future content can be mastered with security features that, for example, block the attack, revoke pirated media, or use native code to correct player vulnerabilities.

INTERNATIONAL SEARCH REPORT

International application No.

PCT/US04/21621

Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☐ Claims Nos.:
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
3. ☐ Claims Nos.:
because they are dependant claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box No. III Observations where unity of invention is lacking (Continuation of Item 3 of first sheet)

This International Searching Authority found multiple inventions in this International application, as follows:
Please See Continuation Sheet

1. ☒ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

☐
☐

The additional search fees were accompanied by the applicant's protest.

No protest accompanied the payment of additional search fees.

INTERNATIONAL SEARCH REPORT

International application No.
PCT/USO4/21621

BOX III. OBSERVATIONS WHERE UNITY OF INVENTION IS LACKING

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid.

Group 1, claim(s) 1-4 and 11, drawn to a method for limiting access to non-volatile digital storage contained in a device executing instructions in a Turing-complete interpreter.

Group 2, claim(s) 5-7, drawn to a digital optical storage medium containing encrypted audio visual content playback on any of a plurality of device architectures.

Group 3, claim(s) 8-10, drawn to an automated method for enabling a playback device containing a nonvolatile memory to determine whether permission to use digital optical disk media has been revoked.

The inventions listed as Groups 1-3 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group 1 includes limitations directed towards access control via authentication of a hash value of executable instructions, Group 2 is directed towards an optical disk with a playback program encoded thereupon which when executed determines which of a plurality of security weaknesses are present in a playback (executing) device, Group 3 is directed towards limiting access to a digital storage medium via determining if an instance of permission to utilize the medium has been revoked based upon reading an identifier from the medium and comparison with a revocation list.

No generic linking claim(s) is found in the claim groups.

The 3 claim groups are independent and distinct from one another as per MPEP Sec. 802.21 and within the meaning of 35 USC 121.

The requirement for unity of invention referred to in Rule 13.1 is not met. There is no technical relationship among the 3 inventions claimed in claim groups 1-3 involving one or more of the same or corresponding technical features.

INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

April 15, 2005

Applicant's or agent's file reference 8758PCT	FOR FURTHER ACTION see Form PCT/ISA/220 as well as, where applicable, item 5 below.	
International application No. PCT/US04/21621	International filing date (day/month/year) 07 July 2004 (07.07.2004)	(Earliest) Priority Date (day/month/year) 07 July 2003 (07.07.2003)
Applicant CRYPTOGRAPHY RESEARCH		

This international search report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This international search report consists of a total of 6 sheets.

It is also accompanied by a copy of each prior art document cited in this report.

1. Basis of the Report

a. With regard to the language, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

The international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).

b. ☐

With regard to any nucleotide and/or amino acid sequence disclosed in the international application, see Box No. I.

2. ☐ Certain claims were found unsearchable (See Box No. II)

3. ☒ Unity of invention is lacking (See Box No. III)

4. With regard to the title,

the text is approved as submitted by the applicant.

the text has been established by this Authority to read as follows:

5. With regard to the abstract,

the text is approved as submitted by the applicant.

the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box No. IV. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.

6. With regard to the drawings,

a. the figure of the drawings to be published with the abstract is Figure No. 2

as suggested by the applicant.

as selected by this Authority, because the applicant failed to suggest a figure.

as selected by this Authority, because this figure better characterizes the invention.

b. ☐

none of the figures is to be published with the abstract.

Form PCT/ISA/210 (first sheet) (January 2004)

BOX III. OBSERVATIONS WHERE UNITY OF INVENTION IS LACKING

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid.

Group 1, claim(s) 1-4 and 11, drawn to a method for limiting access to non-volatile digital storage contained in a device executing instructions in a Touring-complete interpreter.

Group 2, claim(s) 5-7, drawn to a digital optical storage medium containing encrypted audiovisual content playback on any of a plurality of device architectures.

Group 3, claim(s) 8-10, drawn to an automated method for enabling a playback device containing a nonvolatile memory to determine whether permission to use digital optical disk media has been revoked.

The inventions listed as Groups 1-3 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group 1 includes limitations directed towards access control via authentication of a hash value of executable instructions, Group 2 is directed towards an optical disk with a playback program encoded thereupon which when executed determines which of a plurality of security weaknesses are present in a playback (executing) device, Group 3 is directed towards limiting access to a digital storage medium via determining if an instance of permission to utilize the medium has been revoked based upon reading an identifier from the medium and comparison with a revocation list.

No generic linking claim(s) is found in the claim groups.

The 3 claim groups are independent and distinct from one another as per MPEP Sec. 802.21 and within the meaning of 35 USC 121.

The requirement for unity of invention referred to in Rule 13.1 is not met. There is no technical relationship among the 3 inventions claimed in claim groups 1-3 involving one or more of the same or corresponding technical features.
